Appendix III: Final Interview

Mr. William Koh

Date: 2024.11.29
Duration: 15 minutes
Location: Academic building

Q: How do you feel about the additional functions?

A: Well, based on the basic functions, I would say additional functions are quite helpful for me to decide my daily routine and outfit, such as the weather.

Q: Does the new table fit your usages?

A: Humm, it's good I think, since all data clearly stated and can be edit.

Q: How does the route design for you?

A: I think it's good as when I was hurrying to my work, I was able to choose the route with least time. It well performs the ways that I am heading to, like each street or road which it's quite intuitional. If there will be a software mode, I think will be the best as sometimes the browsers are working badly, with many advertisement.

Q: How does the final overall performance?

A: It was totally out of my expectation as many addition-on functions are improving my experience when I access to the website. Thank you for your program.

Thank you for everything.
